THE 7 SOLUTION CATEGORIES — LATAM 4.0 by Better Technologies

1. Industrial Acceleration (Nearshoring + Smart Maquila)

What it is:
Relocating global production to LATAM with speed and cost efficiency.

What we sell:

- Operational setup in Paraguay / Mexico / Colombia
- Industrial supplier networks
- Cost optimization (30–60%)
- Local operational management

Target clients:

- German Mittelstand
- Automotive OEMs
- Companies looking to exit Asia

---

2. Smart Supply Chains (Supply Chain as a Service)

What it is:
Being the brain that connects LATAM suppliers with global demand.

What we sell:

- Strategic sourcing

- Supplier management
- Traceability
- Integrated logistics

Differentiator:
We don't sell products → we sell certainty of supply

---

3. Talent Infrastructure (Nearshore Digital + Innovation Ops)

What it is:
LATAM as a hub for technical and operational talent.

What we sell:

- Dedicated teams
- Remote operations
- AI workflows for traditional companies
- Process automation

Quick wins:

- Automated back office
- Customer support (AI + human hybrid)
- Dev teams at 50% of EU/US cost

---

4. Energy & Resource Arbitrage

What it is:
Leveraging LATAM's massive advantage in energy and natural resources.

What we sell:

- Access to low-cost energy (Paraguay, etc.)
- Projects tied to food, water, lithium, raw materials.
- Energy-intensive operations

Industries / products:

- Retail
- Data centers
- Battery production (early stage)
- Mineral processing

Note:
Mid-term play, but massive upside.

---

5. Market Entry & Local Ops (LATAM Soft Landing)

What it is:
Helping foreign companies operate in LATAM frictionlessly.

What we sell:

- Legal incorporation
- Commercial operations
- Local representation
- Partner management

Clients:

- European and US companies entering LATAM

Positioning:
This makes Better the gateway to the continent

---

6. Digitalization of Legacy Industries

What it is:
Modernizing traditional industries from LATAM.

What we sell:

- Factory digitalization
- Internal systems
- Integrations
- Data + applied AI

Target sectors:

- Agriculture
- Manufacturing
- Logistics

---

7. Strategic Trade Layer

What it is:
Becoming a strategic intermediary between economic blocs.

What we sell:

- Supply contracts

- Industrial trading
- Structuring international deals

Example:
Germany needs X → we produce it in LATAM → we deliver it with financial structuring

---

HOW THIS SHOULD SOUND EXTERNALLY

Never say:

> "We are a consulting firm"

Say:

> "We build and operate industrial and digital infrastructure in Latin America for global companies."
